

Work Place Violence And Civilians Disturbance.

Hi,

Dear Admin

Ihsan Here from Pakistan.

i would like to present week 2 assailment coz i missed my session as task.

Here in my country we have to face a little bit violence during shifting the victim, specifically during crime cases and major RTA.

Relevant in incident is involvement of public

They give the instructions of Rescuers, some time using abusive language and interference of rescue process.

My job role there to give them consolation and secure the scene as well scene assessment.

very low security risk here coz if here some time bomb blast emergency ,so very high alert security arrangement by security departments.
